Re: CALFED category III proposal

Dear Jim,

As you know we have been interested for some time, in some sort of stream rehab work on a stretch of Last Chance Creek. This project may address this and more.

A number of times in the past, we have suggested to the Forest Service that a simple road realignment on higher ground and away from the creek, would go far in healing stream banks.

Our situation changes yearly now, as we try to keep up with increasing demands to manage for different factors when grazing on adjoining Federal lands. Often the only way to satisfy new requirements is to take up the slack by shifting to our private land portion.

Our livelihood depends upon grazing our cattle on this range and it looks nearly impossible now, to remove or rest a part of our vital grazing area.

We are unsure what this project proposes and welcome the opportunity to meet with you on the ground. If the road change mentioned above were accomplished, there would then be room for a fence between the stream and the road. A riparian pasture could possibly be created and managed to allow bank restoration to proceed rapidly. This small part of what looks like an extensive project, is still of interest to us. Any further work involving our private land can be discussed on the ground as well as the ramifications such undertakings may have on our operation.

Sincerely,

A handwritten signature in cursive script that reads "John Matley".

Attn: Jim Wilcox

Dear Jim,

We have received the FR-CRM's proposal (executive summary) regarding the restoration of the upper Last Chance Creek watershed, specifically the Ferris-Meadowview reach. The Public Works Department has reviewed your request for the improvement (as part of your application for CALFED Bay Delta Program funding) of an approximate 1 mile length of our County Road 101, the Plinco Mine Road. This proposal would either relocate the road up slope to reduce its impact on the meadow, or raise the road in place to reduce springtime mud problems. The Plinco Mine Road is relatively lightly used, being in a remote northeasterly location of Plumas County, and historically receives only periodic grading/maintenance.

As a member of the resource management group, the Plumas County Department of Public Works is supportive of the goals of this project, i.e. improvement of water retention/release and sediment storage as well as the restoration of upper watershed meadows necessary to fulfill these goals. Improvement of the 1 mile stretch of Plinco Mine Road as part of the CALFED project is therefore conceptually approved. We would appreciate being asked to provide some input toward final design and construction decisions. An encroachment permit will be required when final design is to be implemented.

Please feel free to call me if you have any questions.

Sincerely,

Dear Jim,

I am writing to thank you for submitting the Ferris-Meadowview component of the Last Chance Creek Watershed Restoration Project as a CalFed proposal.

As you know, Beckwourth Ranger District has started a Landscape Assessment of the Last Chance watershed, we expect to complete this analysis by the end of 1999. I know that stream and meadow restoration projects will be identified in our analysis as some of the highest priority management opportunities in this severely damaged watershed.

The Ferris-Meadowview project will be a major component of the continuing restoration efforts which the Feather River CRM and the Plumas National Forest have jointly conducted in the Last Chance Creek watershed. As the Line Officer responsible for this district of the Plumas National Forest, I am pleased that you are seeking funding for this important project.

Please feel free to call me at any time if I can be of help in getting this project started.

Sincerely,
